The Urano System

- Academic data from researches
 - scattered among a variety of sources
- Heterogeneous sources
 - may provide complementary, redundant and/or inconsistent data
- Administrative reports
 - usually generated manually
 - contain basically the same information, but are organized in different formats

Objectives

- Gathering academic data from distinct sources and integrating them into a central database
- Enabling consistent reports to be generated automatically

Aiding the decision making and the institutional administration

Data Sources

- University's corporate systems
 - responsible for providing transactional data relating to undergraduate and postgraduate educational activities
 - examples: the Júpiter and the Fênix systems (http://www.sistemas.usp.br)
- External sources
 - public sources containing academic data
 - examples: Lattes Database (http://lattes.cnpq.br)

Main Categories of Reports

- Lecturers, and their departments and personal information
- Papers
 - papers in journals, proceedings, books and book chapters
- Supervisions
 - of undergraduate and postgraduate students
- Participation on examination boards
 - master, PhD

Main Categories of Reports

- Participation in conferences and workshops
- Courses
 - undergraduate and postgraduate studies
- Projects, and their sponsors
 - projects, and their sponsors
