Março 2011

**Aula 02**

**Aula 02 – Robôs Móveis Autônomos**

**Agenda:**

**Robôs Móveis Autônomos:**

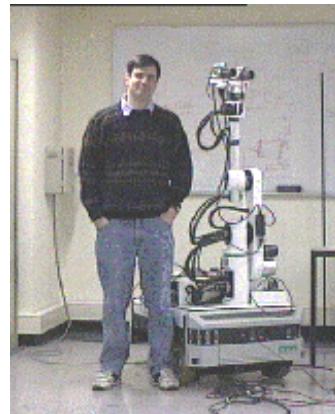

1. História
2. Tipos de RMAs
3. Exemplos de Aplicações
4. Desafios
5. Futuro?

2

## Robôs Móveis Autônomos

### Robôs Móveis Autônomos

Histórico – 1868: A Steam Man  
Mr. Zadock Dederick<sup>1</sup>, a Newark machinist,  
has invented a man; one that, moved by steam,  
will perform some of the most important functions of  
humanity; that will, standing upright, walk or run...

## Robôs Móveis Autônomos

### Robôs Móveis Autônomos

Histórico – Electric Dog - 1912  
An electric dog, the ancestor of all phototropic self-directing robots,  
was designed in 1912 and constructed in the USA by researchers  
John Hammond, Jr. and Benjamin Miessner

Março 2011

David Pride 2000

## Robôs Móveis Autônomos

### Robôs Móveis Autônomos

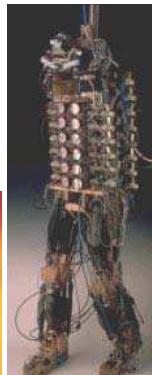

Histórico – Ficção Científica  
1977 Droids – Film: Star Wars - R2-D2, C-3PO

1983: Zeaker  
by David Buckley

1988: Shadow  
Biped Walker  
by David Buckley

13  
Março 2011

## Robôs Móveis Autônomos

### Robôs Móveis Autônomos

#### Histórico

1989: Genghis - a 1Kg six legged robot which walks under **subsumption control** and has an extremely distributed control system.  
Brooks, Rodney – MIT AI Lab

14  
Março 2011

## Robôs Móveis Autônomos

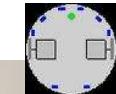

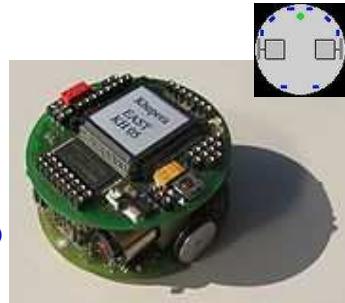

### Robôs Móveis Autônomos

Histórico – 1996 Khepera (EPFL)

Khepera mobile robot [From Wikipedia]

The first generation Khepera robot released in 1996

The Khepera is a small (5.5 cm) differential wheeled mobile robot that was developed at the LAMI laboratory of Prof. Jean-Daniel Nicoud at EPFL (Lausanne, Switzerland) in the mid '90s. It was developed by Edo. Franz, Francesco Mondada, André Guignard and others.

Small, fast, and architected around a Motorola 68331, it served researchers for 10 years, widely used by over 500 universities worldwide. It is now outdated, even with its upgraded processor and flash in version 2.0.
